CREATE LABS UGA

Athens, GA

Associate Engineer

December 2024 - Present

- Developing and managing the Create Labs website using Ghost CMS, ensuring a seamless and user-friendly experience
- Designing and 3D printing an AI processor, contributing to innovative hardware development and prototyping

LEADERSHIP EXPERIENCE AND PROJECTS

Culinary Compass

Atlanta, GA

Developer

May 2024 - August 2024

- Through the integration of a recipe API, my peer, Yogesh Kartikayan, and I were able to apply our knowledge of Python, HTML, and C++ to Django software along with the API to build a recipe search engine
- The project used complex algorithms to retrieve recipes based on user input, incorporating responsive design for an optimized experience.

Leaders For A Cause

Atlanta, GA

Project Manager

August 2023 - January 2024

- The organization tackled downtown and campus issues through group initiatives with GSU students and local organizations.
- **Project EcoPawer:** Improved recycling in downtown ATL and GSU dorms via PantherPoints and partnered with GSU Recycling, gaining support from 100+ peers through events in Nov, Dec, and Jan.
